### **DETAILED ACTION**

1. It should be noticed that this application was filed after the parent application, i.e., 08/867,727, was issued; thus, they were not co-pending at the time the invention was filed. Accordingly, it does not benefit the early effect filing date of the parent application.

### ***Information Disclosure Statement***

2. The IDS paper filed June 11, 2001 has been received and placed in the record of file.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chen et al (U.S. Patent No. 5,969,721).

As per claims 1-21, Chen et al disclose a system and method for customizing a computer animation wireframe which now clearly anticipates the features as now claimed. It should be noticed that the 3D range data as described in Chen et al system would have inherently included the depth information of the objects in order to render the object as a three dimensional image on the display screen.
